Home Hygiene

Written by [Pediatric Primary Care Expert Witness](#)

Expert Witness No. 3205

[Click here to view this Expert's CV](#)

Most people associate germs (bacteria, fungi, viruses) with out-door or health care environments. But many germs that can cause infectious illnesses, such as upper-respiratory infections, flu, the common cold and food borne sicknesses, are right in our homes and impact our daily lives [read more...](#)

Introduction of an Equine Equestrian Expert Witness

Written by [Equine Equestrian Expert Witness](#)

Expert Witness No. 709

[Click here to view this Expert's CV](#)

I have worked in the racehorse industry for 25 years, starting in 1973. I received my first license at Hollywood Park, in that same year. I was one of the first women in the industry to receive a license. When I started women were rarely allowed into the barn area. Needless to say, those of us who braved the new frontier had to be twice as good as the boys to ever get a mount on anything, usually the ones the boys were afraid to ride. It was a bit rough for a good 10 years. I prevailed, and in so doing I have earned the respect of the most renowned people in the industry. Including the trainers I have worked for and jockeys I have helped to get a mount to the winner's circle. I know people from California to New York to Kentucky [read more...](#)

How to Increase Recovery in Your Medical Malpractice Cases: Keep the Hospital in the Case

Written by [Hospital Administration Expert Witness](#)

Expert Witness No. 2161

[Click here to view this Expert's CV](#)

Medical malpractice cases obviously require clinical review and lawyers realize that they must employ Medical Expert Witnesses to review their case. Often overlooked is the use of a Hospital Administration Expert Witness who can add significantly to the case by looking at the corporate responsibilities of the Hospital. Adding this type of expert to your team provides the opportunity to increase your recovery by including the mandated insured capacity of the Hospital in the case. In addition, the Hospital always has an interest in the

results of the case and can provide leverage on the involved physicians as the case moves forward. [read more...](#)

Safe Discharge of Pediatric Patients from the Emergency Department

Written by [Pediatric Emergency Medicine Expert Witness](#)

Expert Witness No. 2875

[Click here to view this Expert's CV](#)

The future condition of pediatric patients discharged from the emergency department can never be guaranteed even when the diagnosis has been clearly defined. As a result we are dependent on our clinical judgment of the patients' stability as well as the understanding and capability of the parents in safely discharging patients. Up to 75% of patients/parents do not understand the instructions given at the time of emergency department discharge and not surprisingly almost all malpractice complaints arising from the emergency department have incomplete discharge instructions as a component. What is an "Age of Injury" report, and How to Effectively Use It to Determine Causation?

Written by [Therapeutic Nuclear Medicine Radiology Expert Witness](#)

Medical Expert Witness No. 106

[Click here to view Radiology Site](#)

A picture is worth a thousand words. For litigation purposes, diagnostic images have become a vital tool in leveraging the perception of the case. There is currently a scientific method of determining whether an injury was related or unrelated to the date of an accident, better known as an "Age of Injury" (or

Causation) report. There are many radiologists that can produce an "Age of Injury" report however it is imperative to choose a radiology expert that utilizes effective methodology. [read more...](#)

Wildfire Forensics Accounting

Written By [Wildfire Forensic Accounting Expert](#)

Expert Witness No. 285

[Click here to view this Expert's CV](#)

Wildfire Forensics Accounting is a specialized practice requiring knowledge and experience in wildfire suppression, combined with experience in the administrative infrastructure of the involved agencies. While Wildfire Forensics Accounting is similar to Forensics Accounting in that common accounting practices are used, the use of common Forensics Accounting will not provide productive results. Each wildfire agency operates under a unique set of rules and procedures that are generally revised on a regular basis and all purchase and procurement documents must be evaluated against those specific rules and procedures.
